

A photograph of a lush garden filled with various flowers. In the center, there are several bright yellow flowers, possibly poppies. To the left and right, there are clusters of blue and white flowers, likely cornflowers. The background is a dense thicket of green foliage. The entire image is framed by a light green border.

Re-Purpose Patio Garden

Examples:

The purpose of this garden is to show people of the community that they can grow A garden out of anything. All it takes is a little imagination.

Nixyaawii High School

Working with the youth. Not only providing a good way of life, teaching them work ethics and experience in the horticulture field.

Where: Yellowhawk Tribal Health Center, Large Conference room

Who: Free and Open to the Public ~ Adults only please

How: To sign up, contact Adrienne Berry (541)278-7551

All participants receive a free beginning gardening book and a certificate of completion.

Topics include: Garden site and soil development, garden planning, planting, garden maintenance, and harvesting.

At the end of April of 2016 Yellowhawk Community Health Department will be offering Gardening classes for families on a budget.

Since 2007 “Seed to Supper” has been part of Oregon Food Bank. In 2012, Oregon Food Bank partnered with Oregon State University Extension Office to re-write and co brand the “Seed to Supper” curriculum.

Adrienne has been trained to offer these courses to the CTUIR community. Helping to secure the community to have access to sufficient foods for a healthy life.
