# Introduction

## **REPORT DESCRIPTION**

This report provides estimates of American Indian/Alaska Native (AI/AN) enrollment in Medicaid, Medicare, and Uninsured for the United States (US), all 50 states, and the District of Columbia (DC), the latter of which is hereafter referred to as a state for the purposes of this report. The first page for each state provides a table of AI/AN enrollment in Medicaid, Medicare, and Uninsured for 2012 and 2022. The table shows both the change and the percentage change in insurance enrollment from 2012 to 2022. The middle graph on the first page for each state depicts enrollment rates for Medicare, Medicaid, and Uninsured from 2012 to 2022 for both AI/ANs and the Overall population. These enrollment rates were calculated by dividing the number enrolled in each insurance type by the total population, for both AI/ANs and the Overall population in 2012 and 2022. At the bottom of page one for each state are charts showing dual enrollment rates for AI/ANs and the Overall population ages 65 and greater. These charts show the percentage of those ages 65 and greater enrolled in both Medicare and Medicaid, Medicare only, and neither Medicare nor Medicaid in 2022. The second page for each state focuses on 2022 data, beginning with a chart showing Medicaid enrollment rates by age (0-18, 19-64, and 65 and greater) for AI/ANs and the Overall population. The next chart provides Uninsured rates by age group (0-18, 19-64, and 65 and greater) for AI/ANs and the Overall population. Finally, the last section provides highlighted comparisons for each state.

## **DATA DESCRIPTION: AMERICAN COMMUNITY SURVEY DATA**

This report utilizes the American Community Survey (ACS) 5-year estimates for 2012 and 2022.<sup>1</sup> The 5-year estimate represents data collected over a period of the preceding five years. For example, the 2022 ACS 5-year estimate data includes survey data from 2018-2022 while the 2012 ACS 5-year estimate data includes survey data from 2008-2012. The 5-year estimates have increased statistical reliability for small population subgroups compared to the one-year data.<sup>2</sup> This is the seventh year the National Indian Health Board (NIHB) has produced reports on American Indian/Alaska Native health insurance enrollment. This year's report continues the comparison of current year estimates of Medicaid enrollment, Medicare enrollment, and Uninsured to estimates from 2012, which was the year prior to the full implementation of the Affordable Care Act in 2013.

## **POPULATION DEFINITION, SAMPLING ERROR, AND OMITTED VARIABLES**

Data are based on a sample and are subject to sampling variability. The data in this report are reported without the margins of error. Every estimate has a sampling error. The American Indian/Alaska Native population is reported as respondents who self-report as American Indian or Alaska Native alone or in combination with one or more races. Foreign born are included in the AI/AN population estimates within this report.

2 United States Census Bureau. (March 17, 2022). American Community Survey 5-Year Data (2009-2022). <https://www.census.gov/data/developers/data-sets/acs-5year.html>

## NOTE ON AGE ADJUSTMENT

In this report, NIHB does not adjust for differences in the age distributions of the populations being compared (AI/AN and Overall population). There are known differences in the age distributions of these populations. The life expectancy for an AI/AN person born in 2022 is 67.9 years compared to 77.5 years for the Overall population. AI/AN life expectancies are lower than every other racial and ethnic group, ranging from 4.9 to 16.6 years lower.<sup>3</sup> Because of this drastic inequity in life expectancy, the AI/AN population skews younger in age distribution than the Overall population. The figure below uses ACS 2022 data to illustrate the differences in the age distribution of the Overall population compared to the AI/AN population. The figure depicts the impact of a lower life expectancy for AI/ANs. Beginning with the age group “Between 45 and 49”, the percentage of the AI/AN population represented in that age group is smaller than the percentage of the Overall population represented in that same age group. This pattern continues for every group increasing in age. For example, 1.96 percent of the Overall population is “85 years and over” and only .79 percent of the AI/AN population is “85 years and over”.

The differences in age distribution have consequences relevant to this report. For example, these differences may affect Medicare enrollment rates, as most people do not become eligible for Medicare until age 65. In 2022, the life expectancy of the average AI/AN male was 64.6 years<sup>4</sup> indicating that the average AI/AN male would not live long enough to become eligible for Medicare. Age-adjusting the Medicare enrollment rates would obscure the underlying inequity in life expectancy. Thus, NIHB intentionally does not age-adjust in this report to highlight these urgent inequities that must be addressed.

## AI/AN AND OVERALL POPULATION BY AGE FOR THE US IN 2022

<sup>3</sup> Arias, E, Kochanek, K, Xu, J, and Tejada-Vera, B. (November 2023). Provisional Life Expectancy Estimates for 2022. NVSS: Vital Statistics Rapid Release, Report No. 31. <https://www.cdc.gov/nchs/data/vsrr/vsrr031.pdf>

<sup>4</sup> Ibid.

## **CONCERNS OVER MEDICAID UNDERCOUNT IN ACS 2022**

The 2022 Medicaid enrollment rates and enrollment numbers should be interpreted with caution. It has been well documented that the ACS data often undercounts Medicaid enrollment, with pre-pandemic estimates of undercounting ranging from 6.8 to 8.5 percent. However, starting in 2020, the undercount was larger, at approximately 12.1 percent. For 2021, it was estimated that the undercount was approximately 15.1 percent when compared to CMS enrollment data.<sup>5</sup> As of the printing of this report, the Medicaid enrollment undercount for 2022 ACS data has not been estimated. Since this report utilizes 2022 ACS 5-year estimate data, it is difficult to determine the size of the Medicaid enrollment undercount. It has been hypothesized that much of the ACS undercount in 2020 and 2021 may be due to respondent lack of awareness around the Medicaid continuous coverage requirement. Continuous Medicaid eligibility means that very few enrollees were removed from Medicaid during the Public Health Emergency, but many may not have realized they still had Medicaid coverage since states were not required to notify enrollees of their continued coverage.<sup>6</sup> The missing values for race in the Medicaid administrative data (Transformed Medicaid Statistical Information System – T-MSIS)<sup>7</sup> make it difficult to determine the extent of the undercount of ACS data for AI/ANs. Thus, NIHB has not made any corrections to the ACS data. However, NIHB will continue to monitor this issue in the future and attempt to address concerns.

## **FUNDING FOR THE REPORT**

This publication was supported by the Centers for Medicare and Medicaid Services (CMS) of the U.S. Department of Health and Human Services (HHS) as part of a financial assistance award with 100 percent of the funding by CMS/HHS. The contents are those of the author and do not necessarily represent the official views of, nor an endorsement, by CMS/HHS, or the U.S. Government.

# Overall Trends

This section discusses the overall trends found across all 52 regions (US, 50 states, and DC) in the report. While not evident in every state, these trends are true for most states as well as for the US. Comparison of your specific state to the US will help identify if your state follows the trends highlighted below.

## **AI/AN ENROLLMENT IN MEDICAID, MEDICARE, AND UNINSURED IN 2012 AND 2022**

AI/AN Medicare enrollment increased from 2012 to 2022 for the US and all states. In the US and all but three states, the AI/AN Medicaid enrollment also increased from 2012 to 2022.<sup>8</sup> Finally, the number of Uninsured AI/ANs fell from 2012 to 2022 in the US and 41 states.<sup>9</sup>

Please note that an increase or decrease in the number of AI/ANs enrolled in an insurance type does not necessarily imply that the percentage of AI/ANs enrolled in that insurance type, defined as the enrollment rate, changed in the same way. The first table in each state's report does not consider changes in the underlying AI/AN population from 2012 to 2022. While insurance enrollment numbers are helpful in some cases, readers are encouraged to use the graph of enrollment rates from 2012 to 2022 to identify patterns of enrollment in Medicaid, Medicare, and Uninsured in their state.

## **AI/AN ENROLLMENT AND OVERALL POPULATION ENROLLMENT RATES IN MEDICAID, MEDICARE, AND UNINSURED FROM 2012 TO 2022**

### **Medicaid**

For the US and every state, the AI/AN Medicaid enrollment rate was larger than the Overall population Medicaid enrollment rate for 2012 and 2022. For the US and most states, the Medicaid enrollment rate for both AI/ANs and the Overall population increased from 2012 to 2022. However, there are five states where the Medicaid enrollment rate decreased for the Overall population from 2012 to 2022.<sup>10</sup> In all but 12 states, the AI/AN Medicaid enrollment rate increased from 2012 to 2022.<sup>11</sup>

### **Medicare**

In the US and all but three states, the Medicare enrollment rate in the Overall population was larger than the AI/AN Medicare enrollment rate in 2012 and 2022.<sup>12</sup> In every state and the US, the Medicare enrollment rate increased in the Overall population from 2012 to 2022. In all but nine states, the AI/AN Medicare enrollment rate increased from 2012 to 2022.<sup>13</sup>

8 AI/AN Medicaid enrollment decreased in Maine, West Virginia, and Wyoming.

9 The ten states where the number of Uninsured AI/ANs increased are: Alabama, DC, Florida, Georgia, Illinois, Massachusetts, Pennsylvania, South Carolina, Texas, and Utah.

10 These five states are: DC, South Dakota, Texas, Utah, and Wyoming.

11 Of the 12 states, seven did not have Medicaid Expansion as of 2022 (Alabama, Florida, Kansas, South Dakota, Texas, Wisconsin, and Wyoming) and four states expanded Medicaid in 2019 or later (Maine, Missouri, Nebraska, and Utah). Only Hawaii had Medicaid expansion from the beginning - 1/1/2014.

12 The exceptions are DC, Kentucky, and New Hampshire.

13 The Medicare enrollment rate decreased from 2012 to 2022 in DC, Georgia, Illinois, Kentucky, Nebraska, Pennsylvania, and Rhode Island. The Medicare enrollment rate stayed the same from 2012 to 2022 in Arkansas and Virginia.

## Uninsured

As mentioned previously, there were ten states where the number of Uninsured AI/ANs increased from 2012 to 2022. However, when changes in the AI/AN population are considered, the Uninsured rates for both AI/ANs and the Overall population decreased for the US and every state. In addition, with only the exception of DC, the AI/AN Uninsured rate was higher than the Overall population Uninsured rate for both 2012 and 2022.

## 2022 AI/AN AND OVERALL POPULATION DUAL ENROLLMENT RATES IN MEDICAID AND MEDICARE, FOR THOSE AGES 65 AND GREATER

The last two charts on each state's first page compare the Medicare and Medicaid dual enrollment rates for AI/ANs and the Overall population in 2022. For the US and every state, the percentage of those ages 65 and greater who are dually enrolled in both Medicare and Medicaid is higher for AI/ANs than for the Overall population. In addition, the proportion of those ages 65 and greater who are enrolled in neither Medicare nor Medicaid is higher for AI/ANs than the Overall population except for in 13 states.<sup>14</sup>

## 2022 AI/AN AND OVERALL POPULATION MEDICAID ENROLLMENT RATES BY AGE

The largest 2022 Medicaid enrollment rates for both AI/ANs and the Overall population are for the 0-18 age group for the US and every state. In addition, the AI/AN Medicaid enrollment rate is larger than the Overall population Medicaid enrollment rate for all age groups (0-18, 19-64, 65 and greater, and all ages) with only two exceptions.<sup>15</sup>

## 2022 AI/AN AND OVERALL POPULATION UNINSURED RATES BY AGE

The largest 2022 Uninsured rates for both AI/AN and the Overall population are for the 19-64 age group for the US and every state. In addition, for the 19-64 age group, the AI/AN Uninsured rate is larger than the Overall population Uninsured rate for all states and the US. For ages 0-18, the AI/AN Uninsured rate is greater than the Overall population Uninsured rate with 11 exceptions.<sup>16</sup> Lastly, for the 65 and greater age group, the AI/AN Uninsured rate is larger than the Overall population Uninsured rate with 12 exceptions.<sup>17</sup>

14 There are 11 states where the percentage of those ages 65 and greater who are enrolled in neither Medicare nor Medicaid is higher for the Overall population than AI/ANs (Connecticut, Delaware, DC, New Hampshire, Massachusetts, Michigan, Oregon, Rhode Island, Texas, Vermont, and West Virginia). There are two states where the rates are the same (Kentucky and South Carolina).

15 In Arkansas, the AI/AN and Overall Medicaid enrollment rate is the same for the 0-18 age group. In Texas, the Overall population Medicaid enrollment rate is greater than the AI/AN Medicaid enrollment rate for the 0-18 age group.

16 In three states (Hawaii, Pennsylvania, and West Virginia), the Uninsured rate for 0-18-year-olds is equal for AI/ANs and the Overall population. For seven states (Indiana, Kentucky, Louisiana, Maryland, North Carolina, Rhode Island, and Virginia), the 0-18-year-old AI/AN Uninsured rate is lower than the Overall 0-18 Uninsured rate. In DC, the AI/AN Uninsured rate is lower and equal to zero than the Overall 0-18 Uninsured rate.

17 In two states the rates are equal (Illinois and Indiana). In five states (Delaware, Idaho, Oregon, Pennsylvania, Virginia), the Overall Uninsured rate for ages 65 and greater is larger than the AI/AN Uninsured rate. This is also true for Connecticut, DC, Rhode Island, Vermont, and West Virginia, but in these cases, the AI/AN Uninsured rate is 0.

The background is a deep red color with a subtle, repeating geometric pattern of triangles and lines. Several feathers are scattered across the page. One large feather is on the left, extending from the top left towards the center. On the right side, there are several other feathers, some overlapping each other, with varying shades of yellow, orange, and brown. The text is centered on the left side of the page.

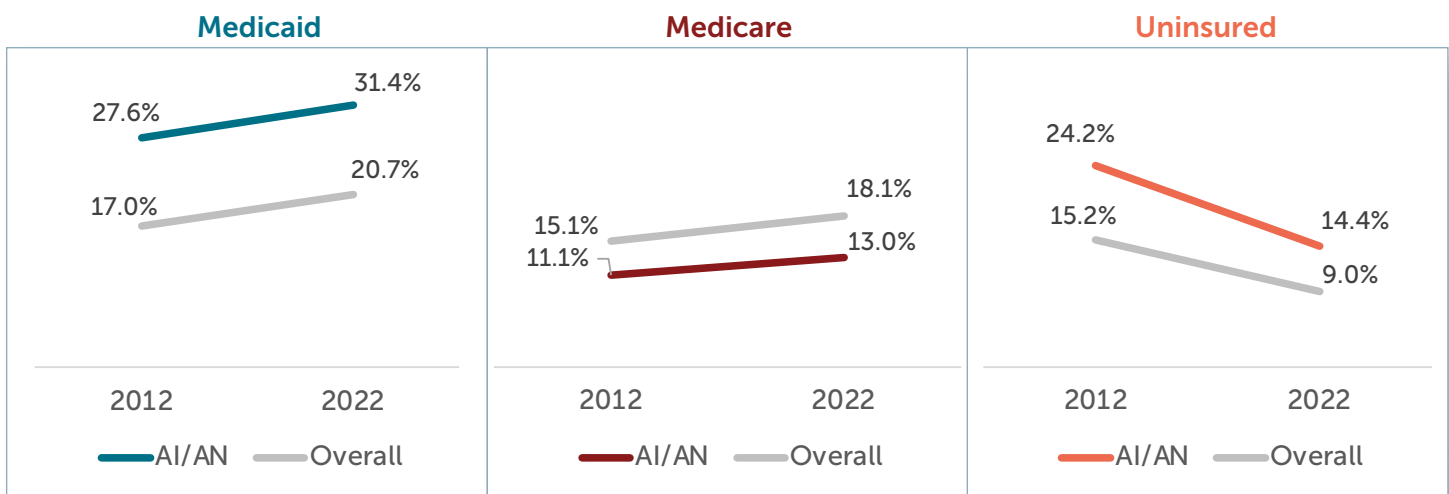

# Status Report by State

# United States

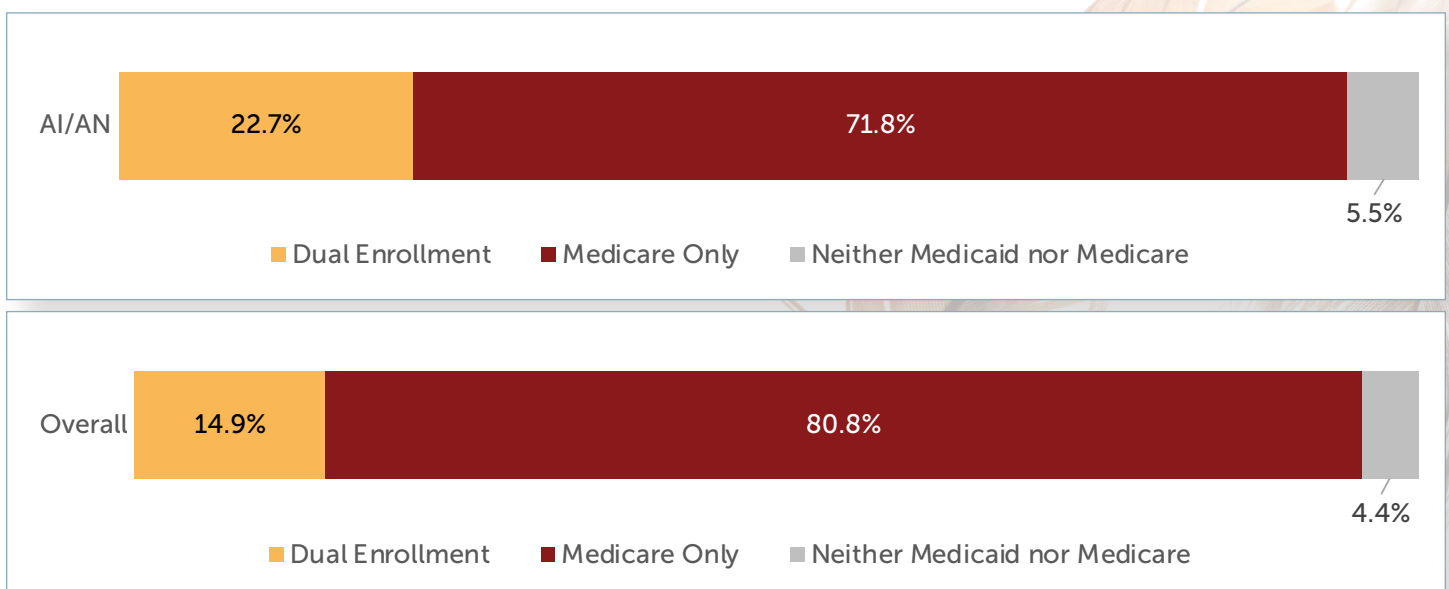

## AI/AN Enrollment in Medicaid, Medicare, and Uninsured in 2012 and 2022

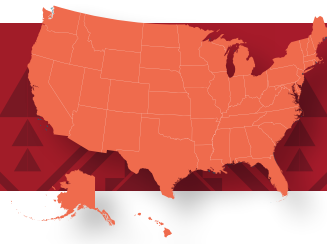

AI/AN ENROLLMENT	2012	2022	CHANGE	PERCENTAGE CHANGE
Medicaid	1,390,355	2,116,845	726,490	52.3%
Medicare	557,388	878,855	321,467	57.7%
Uninsured	1,219,892	971,856	-248,036	-20.3%

## AI/AN Enrollment and Overall Population Enrollment Rates in Medicaid, Medicare, and Uninsured from 2012 to 2022

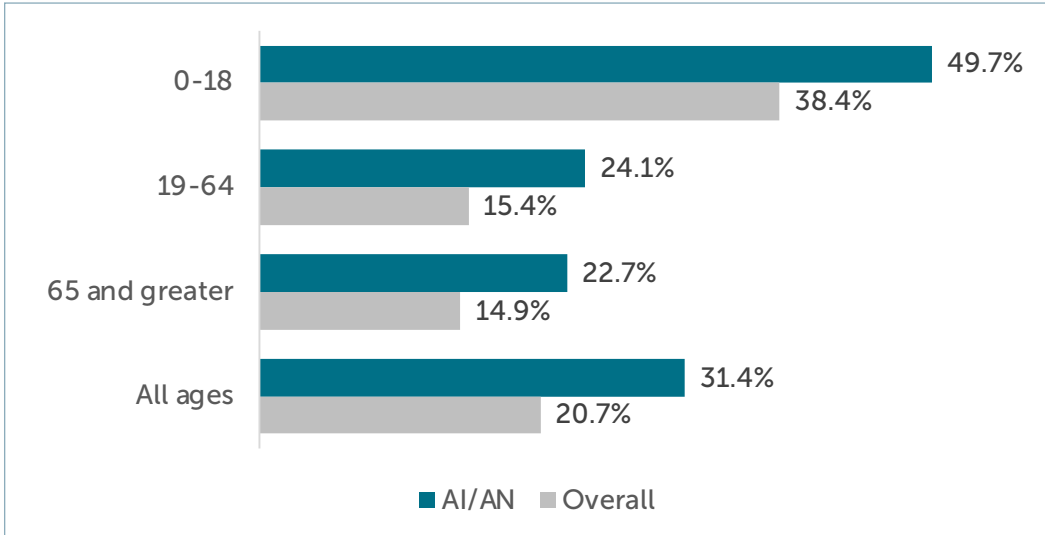

## 2022 AI/AN and Overall Population Dual Enrollment Rates in Medicaid and Medicare, for those Ages 65 and Greater

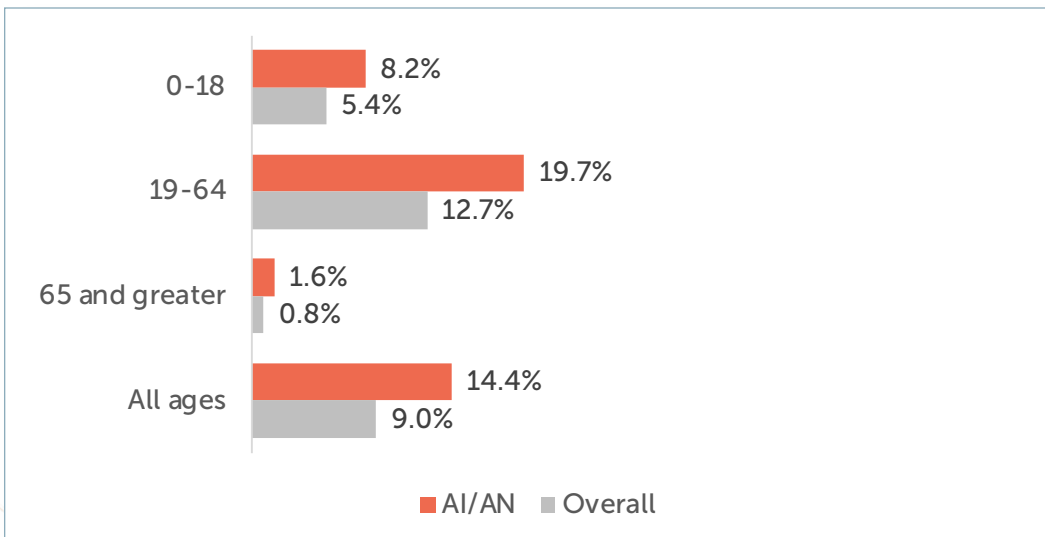

## 2022 AI/AN and Overall Population Medicaid Enrollment Rates by Age

## 2022 AI/AN and Overall Population Uninsured Rates by Age

### Highlighted Comparisons for the United States

- » From 2012 to 2022, the AI/AN Medicaid enrollment rate increased by 3.8 percentage points, while the AI/AN Uninsured rate fell by 9.8 percentage points.
- » For ages 65 and greater, the AI/AN dual enrollment rate is 7.8 percentage points higher than the Overall Population dual enrollment rate.
- » For ages 0-18, the AI/AN Medicaid enrollment rate is 11.3 percentage points higher than the Overall Population Medicaid enrollment rate.
- » For ages 19-64, the AI/AN Uninsured rate is 7.0 percentage points higher than the Overall Population Uninsured rate.

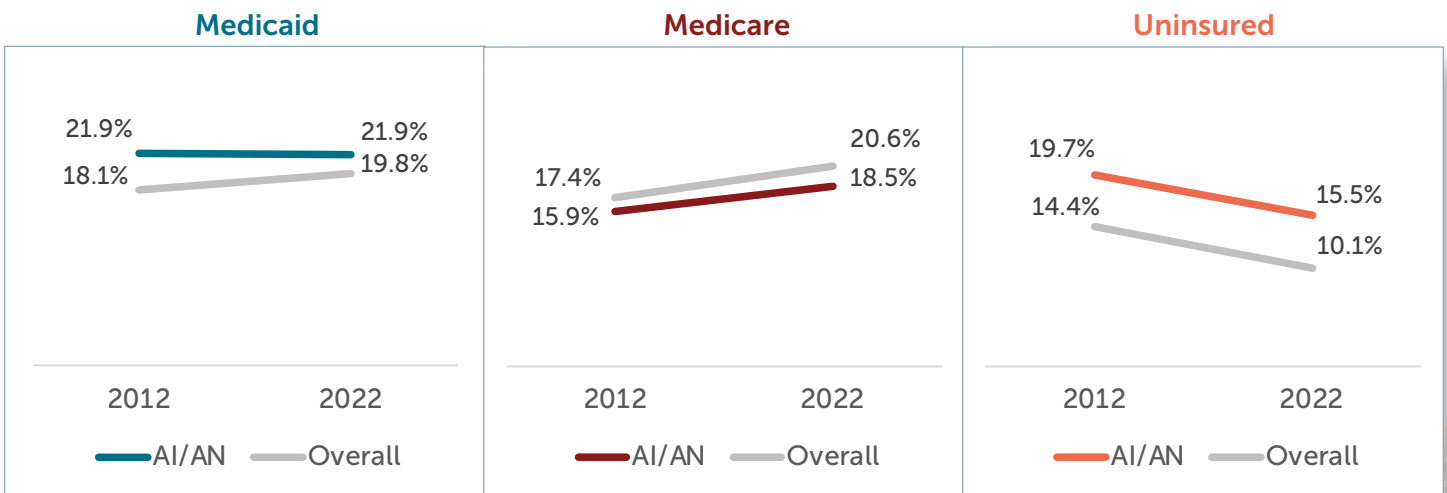

# Alabama

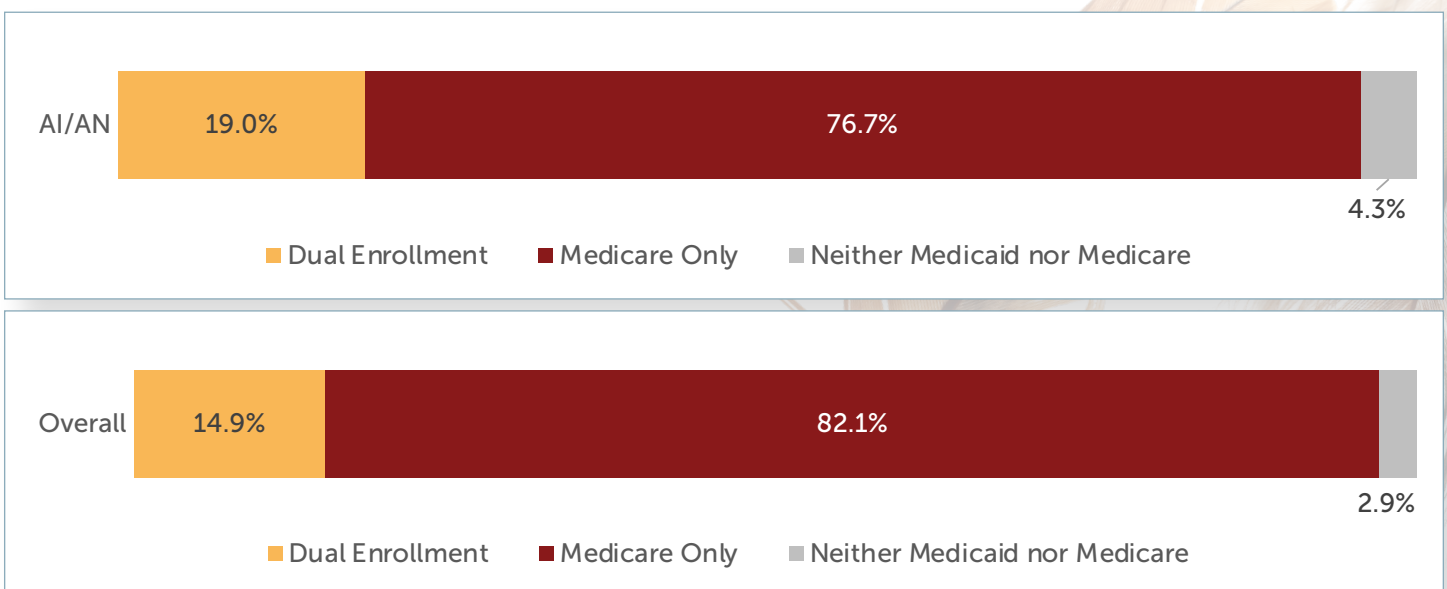

## AI/AN Enrollment in Medicaid, Medicare, and Uninsured in 2012 and 2022

AI/AN ENROLLMENT	2012	2022	CHANGE	PERCENTAGE CHANGE
Medicaid	12,548	16,254	3,706	29.5%
Medicare	9,127	13,707	4,580	50.2%
Uninsured	11,266	11,488	222	2.0%

## AI/AN Enrollment and Overall Population Enrollment Rates in Medicaid, Medicare, and Uninsured from 2012 to 2022

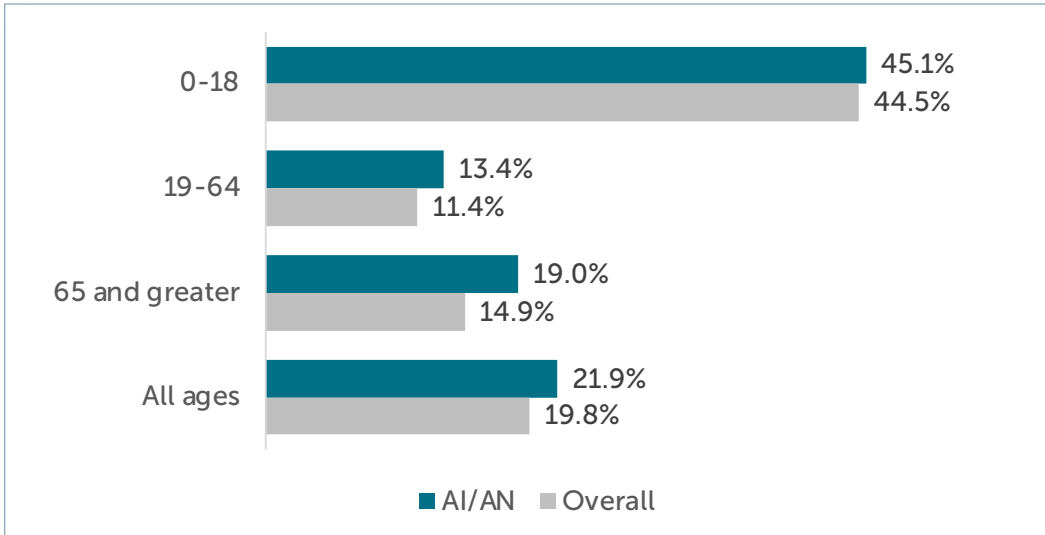

## 2022 AI/AN and Overall Population Dual Enrollment Rates in Medicaid and Medicare, for those Ages 65 and Greater

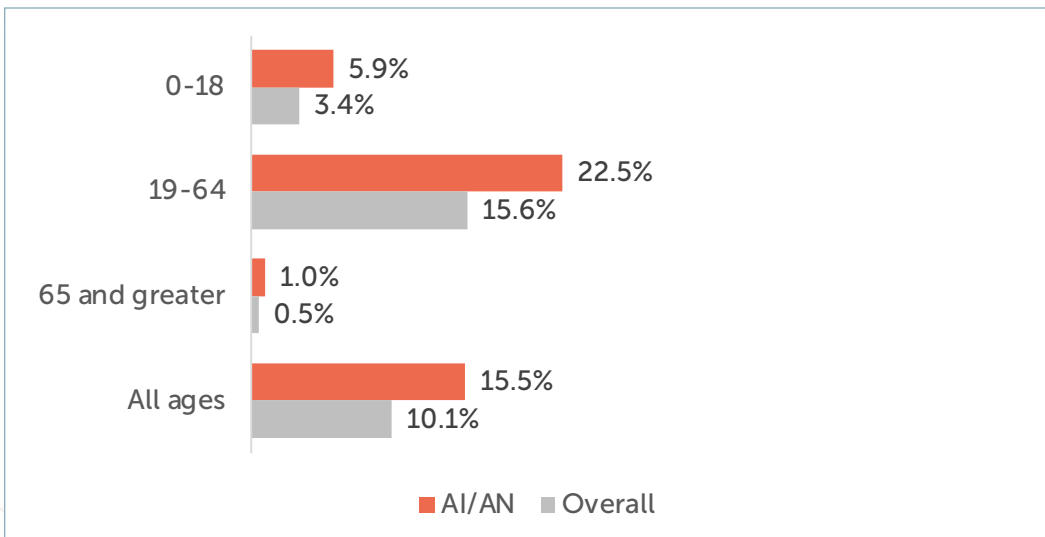

## 2022 AI/AN and Overall Population Medicaid Enrollment Rates by Age

## 2022 AI/AN and Overall Population Uninsured Rates by Age

## Highlighted Comparisons for Alabama

- » From 2012 to 2022, the AI/AN Medicaid enrollment rate stayed the same, while the AI/AN Uninsured rate fell by 4.2 percentage points.
- » For ages 65 and greater, the AI/AN dual enrollment rate is 4.1 percentage points higher than the Overall Population dual enrollment rate.
- » For ages 19-64, the AI/AN Medicaid enrollment rate is 2.0 percentage points higher than the Overall Population Medicaid enrollment rate.
- » For ages 19-64, the AI/AN Uninsured rate is 6.9 percentage points higher than the Overall Population Uninsured rate.

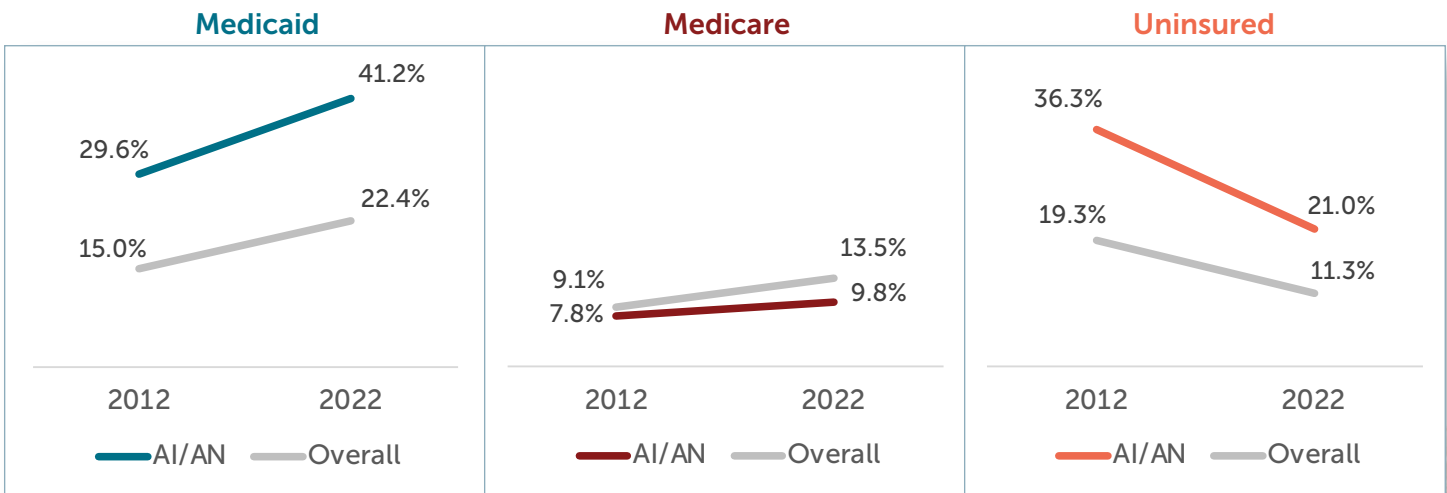

# Alaska

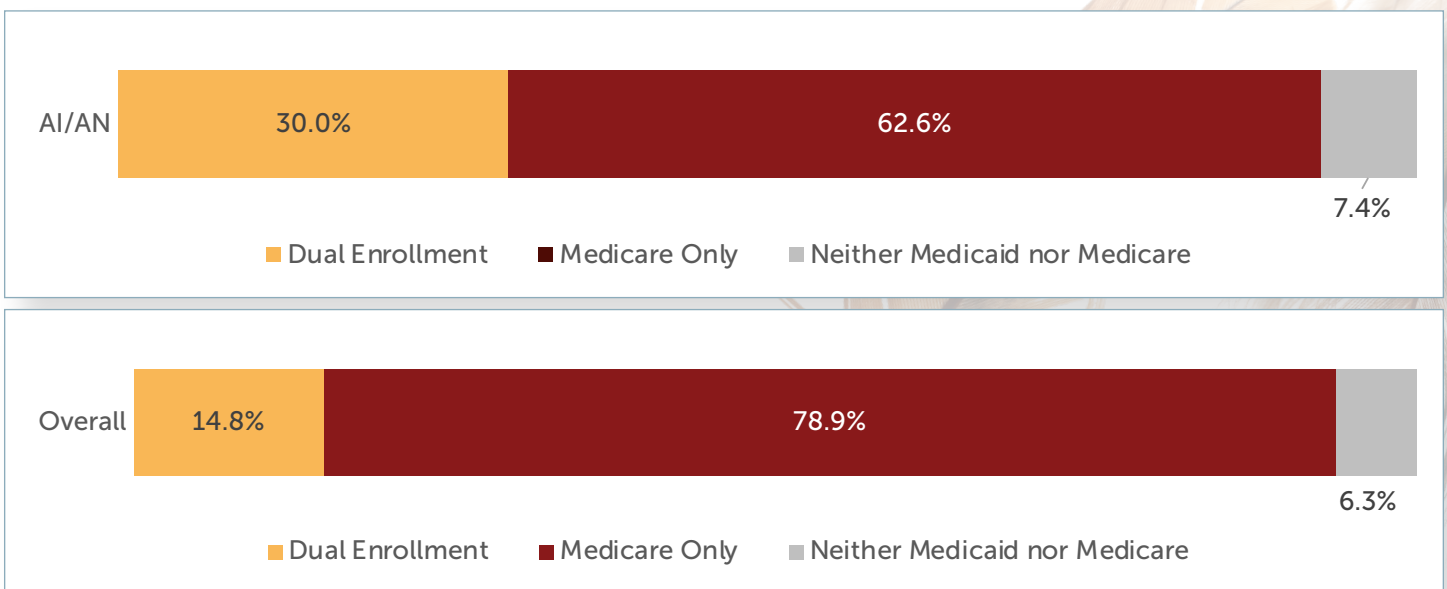

## AI/AN Enrollment in Medicaid, Medicare, and Uninsured in 2012 and 2022

AI/AN ENROLLMENT	2012	2022	CHANGE	PERCENTAGE CHANGE
Medicaid	40,794	61,572	20,778	50.9%
Medicare	10,700	14,661	3,961	37.0%
Uninsured	49,970	31,348	-18,622	-37.3%

## AI/AN Enrollment and Overall Population Enrollment Rates in Medicaid, Medicare, and Uninsured from 2012 to 2022

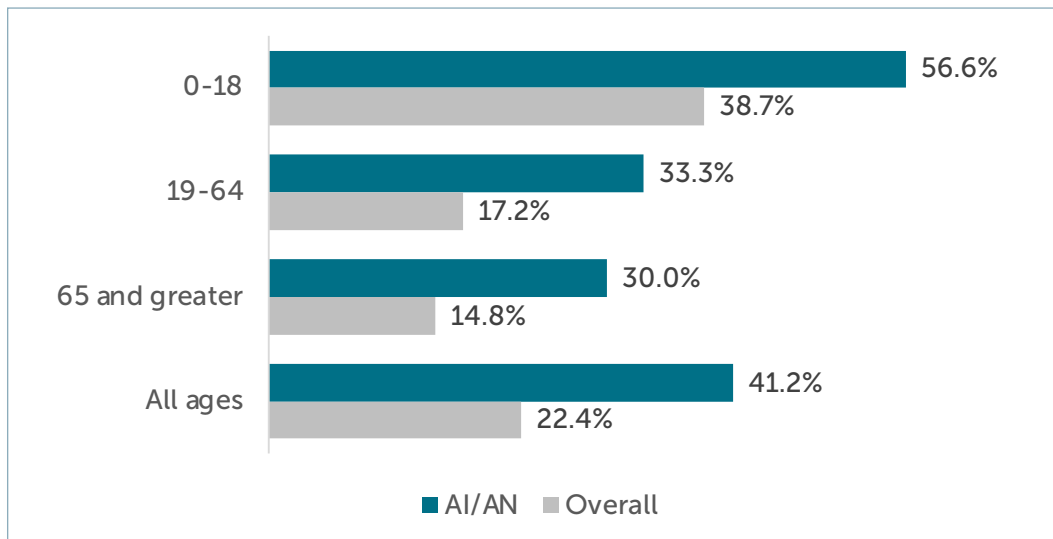

## 2022 AI/AN and Overall Population Dual Enrollment Rates in Medicaid and Medicare, for those Ages 65 and Greater

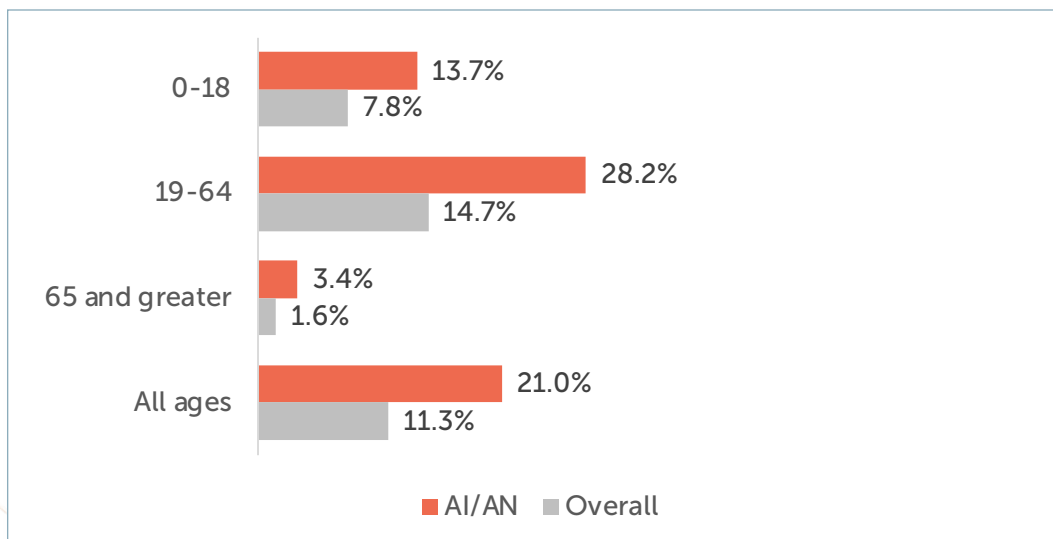

## 2022 AI/AN and Overall Population Medicaid Enrollment Rates by Age

## 2022 AI/AN and Overall Population Uninsured Rates by Age

### Highlighted Comparisons for Alaska

- » From 2012 to 2022, the AI/AN Medicaid enrollment rate increased by 11.6 percentage points, while the AI/AN Uninsured rate fell by 15.3 percentage points.
- » For ages 65 and greater, the AI/AN dual enrollment rate is 15.2 percentage points higher than the Overall Population dual enrollment rate.
- » For ages 0-18, the AI/AN Medicaid enrollment rate is 17.9 percentage points higher than the Overall Population Medicaid enrollment rate.
- » For ages 19-64, the AI/AN Uninsured rate is 13.5 percentage points higher than the Overall Population Uninsured rate.

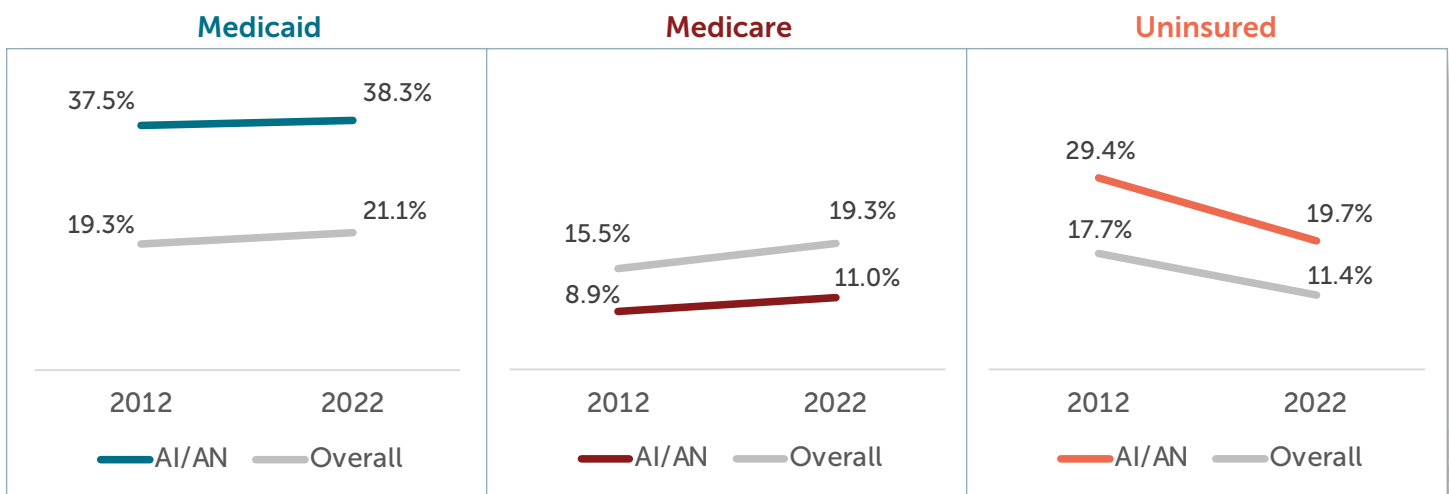

# Arizona

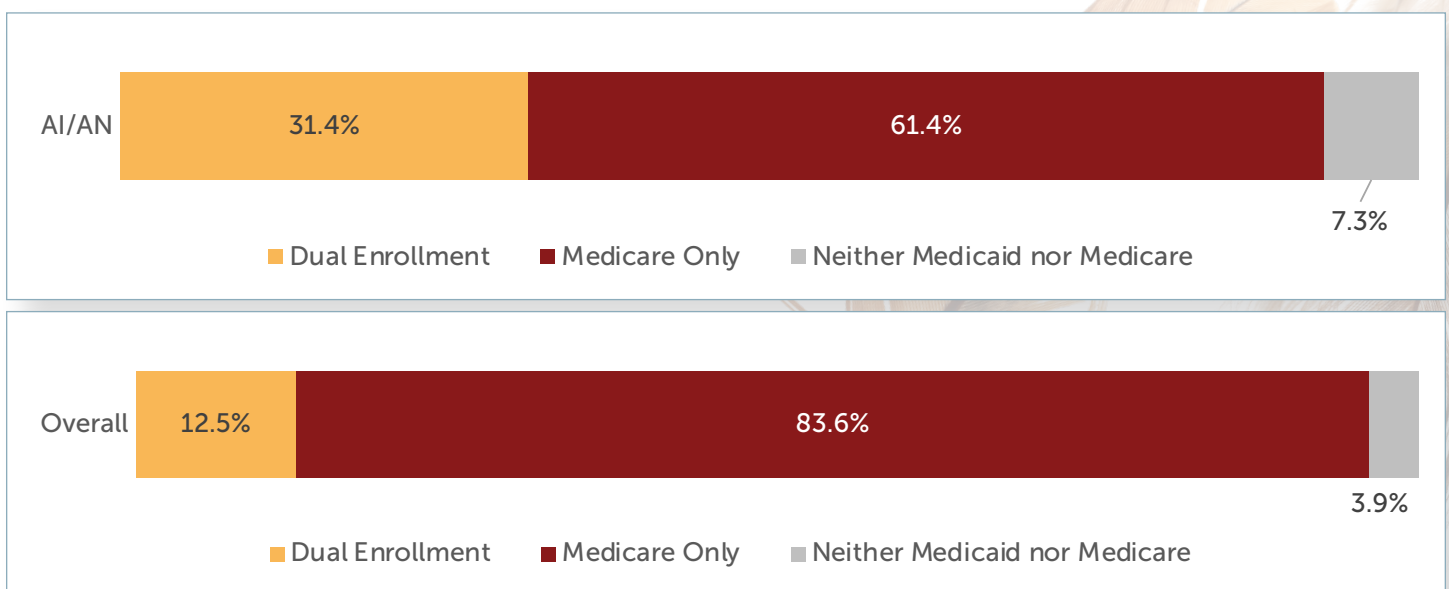

## AI/AN Enrollment in Medicaid, Medicare, and Uninsured in 2012 and 2022

AI/AN ENROLLMENT	2012	2022	CHANGE	PERCENTAGE CHANGE
Medicaid	40,794	61,572	20,778	50.9%
Medicare	10,700	14,661	3,961	37.0%
Uninsured	49,970	31,348	-18,622	-37.3%
